MARTEM-AGS

"Meet the Martem Anti-Gravity GS Backpack, the ultimate blend of innovation & style, designed for MacBook Pro 16" & Laptops up to 15.6". Equipped with our innovative anti-gravity system, this backpack features an elastic suspension in the shoulder straps that significantly reduces the weight on your shoulders and back as you move. This system not only enhances your posture and reduces physical strain but also alleviates stiffness in your back and neck by evenly distributing the weight between your shoulders and hips.

Crafted from high-density fabric, the Martem AGS is meticulously organized both inside and out. The spacious main compartment includes two padded pockets for laptops and tablets, ensuring maximum protection. The versatile front section offers various zippered compartments for organized storage, while two side pockets provide easy access to a water bottle and umbrella.

The ergonomic design includes padded shoulder straps with a suspension system, a trolley strap for easy travel, and a hidden security pocket. Additionally, a removable rain cover, concealed at the bottom, protects your backpack from the elements, making the Martem Gravity your ideal companion for any weather."

Features

- **AGS, Anti-Gravity System:** Less weight on your shoulders for improved posture.
- **Well-Organized Pockets:** Designed for easy access and efficient storage.
- **Security Pocket on the Back:** Keep your valuables safe and secure.
- **Padded Shoulder Straps with Suspension System:** Enhanced comfort with reduced strain.
- **Ergonomic Back:** Supports natural alignment for all-day wear.
- **Removable Rain Cover:** Hidden at the bottom, ready to protect your backpack in wet conditions.
- **Cords with All-Over Pattern:** Adds a touch of style to the functional design.
- **Two Padded Interior Pockets:** Safely store laptops and tablets with extra protection.
- **Eco-Friendly:** Made from high-density recycled fabric, combining sustainability with durability.
